## **DETAILED ACTION**

An extension of time under 37 CFR 1.136(a) is required to place this application in condition for allowance. During a telephone conversation conducted on 8/14/07, Mr. Sistare requested an extension of time for three MONTH(S) and authorized the Director to charge Deposit Account No. 50-0573, for this extension.

## Allowable Subject Matter

Claims 1-22 are allowed.

The closest prior art to the instant invention is Katbi et al. (U.S. Patent No. 5,230,591). Katbi et al. teaches a cutting insert having a multi-cornered base body (square when viewed in top view, fig 2) including top and bottom surfaces (12 & 14), side flanks (26, 28, 30 & 32) interconnected by corner surfaces, cutting surface (36) on top and/or bottom surface, peripheral cutting edge (38) formed at the intersection of side flanks and top and bottom surfaces (12 & 14) (see figure 1 and Col. 2, lines 40-45). Katbi et al. also teaches the cutting surface having a central bore (34), a plateau (16) surrounded by a peripheral positive rake surface (46) that is situated between the plateau surface (16) and the cutting edge (38). Furthermore, Katbi et al. teaches an upwardly extending variable peripheral step (48) interconnecting the plateau (52) and the rake surface (46) (with the corner step portions extending uninterruptedly along the respective corner rake surface portions) (see figure 2, which also shows that step (48) is linear when viewed perpendicular to the cutting surface). Additionally, Katbi et al. teaches side flanks forming obtuse corners (see figure 2).

Application/Control Number: 10/826,311 Page 3

Art Unit: 3722

However, Katbi et al. fails to anticipate or make obvious the plateau surface also defining a seating surface.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sara Addisu at (571) 272-6082. The examiner can

normally be reached on 8:30 am - 5 PM.

Business Center (EBC) at 866-217-9197 (toll-free).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Monica Carter can be reached on (571) 272-4475. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
